Art Unit: 2872

1. Claims 1-4 and 22-25 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification, as originally filed, fails to provide an enabling disclosure as to how to make an optical device in such a manner that a plurality of individual optical elements (mirrors) are positioned on a basic body and the plurality of individual optical elements (mirrors) are connected to the basic body by a galvanoplastic joining technique. Note Fig. 2 and page 6, lines 30 to 34 of the specification, which states that the mirror elements 9 placed on the basic body 8 are connected to the basic body 8 by a galvanoplastic joining technique, as indicated by an intermediate layer 10 between the mirror elements 9 and the basic body 8.

Thus, it is unclear to the examiner how an intermediate layer, formed by a galvanoplastic joining technique, can possibly be located between the individual optical elements (mirrors) and the basic body when the individual optical elements (mirrors) are positioned on the basic body due to the fact that the galvanoplastic technique would appear to substantially cover all of the exterior surfaces except for the interface between the individual optical elements (mirrors) and the basic body.

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
